EXPERIENCE

Tata Consultancy Services(TCS)
Full Stack Java Developer

2021-Present
Hyderabad, Telangana

At Tata Consultancy Services (TCS), I embarked on a dynamic career journey that involved comprehensive training and hands-on experience in a range of technologies. Received comprehensive training in a diverse set of programming languages and database management systems, fostering proficiency in various software development tools and techniques. My role encompassed the following key components:

- Worked on a pivotal project for Adani Ports and Cargo called DYNAport application for capturing port operations data, Specialized in the Invoice Module, implementing solutions for complex business requirements.
- Led a team of junior developers in the successful completion and provided comprehensive Knowledge Transfer (KT) sessions to junior developers, ensuring a smooth onboarding process and accelerating their understanding of project requirements and technologies.
- Introduced and implemented JUnit testing framework to enhance code quality and streamline the testing process within the project.
- Applied Agile Scrum methodologies, completing tasks within given sprints.
- Received multiple on-spot awards for outstanding performance.
- Recognized for dedication and contributions to the team's success.
- Engaged with clients to understand unique requirements.
- Translated customer needs into effective code solutions.
